## Summary

Software Engineering student with strong foundations in **C++, Python, Data Structures & Algorithms, SQL, and Object-Oriented Programming**. Hands-on experience building **full-stack, backend, real-time, and AI-powered applications** using React, Node.js, Express.js, FastAPI, MongoDB, and REST APIs. Experienced in **LLM integration, prompt engineering, authentication, API development, and real-time communication**, with a focus on building reliable and maintainable software.

## Education

| Degree | Institute | Board / University | CGPA/Percentage | Year |
|---|---|---|---|---|
| B.Tech ECE (IIOT) | National Institute of Technology, Kurukshetra | NIT Kurukshetra | 8.18 | 2023-2027 |
| Senior Secondary | St Joseph Indian Composite PU College | KSEAB | 94% | 2021 |
| Matriculation | The Colonel Hill English High School | KSEAB | 88.64% | 2019 |

## Projects

- **AI Portfolio Assistant** *August 2026 – Present*
  *AI-Powered Interactive Portfolio & Resume Chatbot* **GitHub**
  – Built an AI-powered portfolio assistant using **Python, FastAPI, React, and LLM APIs** that enables recruiters to query education, skills, projects, and experience using natural language.
  – Implemented **profile-aware prompt engineering** using structured portfolio data to ground LLM responses and reduce unsupported or fabricated information.
  – Implemented **streaming LLM responses** using FastAPI and React, enabling incremental response rendering for a responsive conversational interface.

- **YuktaVihar** *July 2026 – Present*
  *Full Stack Vacation Rental Marketplace* **GitHub**
  – Built a full-stack vacation rental marketplace using **Node.js, Express.js, MongoDB, EJS, Bootstrap, Cloudinary, and Passport.js** following the MVC architecture.
  – Implemented secure **user authentication and authorization**, property listing CRUD operations, protected routes, server-side validation, and ownership-based access control.
  – Designed modular backend components and integrated **MongoDB for persistent data management** and Cloudinary for image storage and delivery.

- **Vision Bridge (Live)** *March 2026 – April 2026*
  *Real-Time Video Conferencing Platform* **GitHub**
  – Architected and developed a real-time video conferencing platform using **React.js, Node.js, WebRTC, and Socket.io** for low-latency audio and video communication.
  – Implemented **real-time signaling and room management** using Socket.io and WebRTC, enabling users to create and join conferencing sessions with peer-to-peer communication.
  – Designed **RESTful APIs** with Express.js, integrated MongoDB for data persistence, implemented authentication using Bcrypt, and deployed the application for live access.

## Technical Skills

**Languages:** C++, Python, JavaScript, SQL

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

**Backend:** Node.js, Express.js, FastAPI, REST APIs, Passport.js

**Databases:** MySQL, MongoDB

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, EJS

**AI & GenAI:** LLM APIs, Prompt Engineering, LLM Integration, Streaming LLM Responses, Context-Aware Prompting

**Software Engineering:** Authentication & Authorization, API Development, MVC Architecture, Real-Time Systems, Debugging, Deployment

**Developer Tools:** Git, GitHub, VS Code, Postman, Cloudinary, Render

## Achievements

- Solved **300+ Data Structures and Algorithms problems** across LeetCode and GeeksforGeeks **LeetCode** | **GeeksforGeeks**
- Secured **98.48 Percentile** in the **JEE Main** Examination.
